CONSPACE ROOMS

INTERACTIVE EXPERIENCE

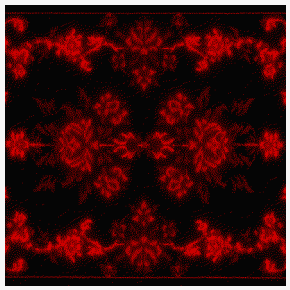

CONSPACE ROOMS

THE PIECE

A walk through a labyrinth of half-lit rooms where eighteen works from the SOULS cycle by UVALISS hang. It is built anew for every visit. Its three zones follow the visual arc of the cycle: fear, memory and acceptance. In a gallery, one visitor steers the projection with bare hands while others watch. The works hang next door. An artwork. Not therapy or a psychological or medical service. 16+.

FEAR
Hospital corridors.

MEMORY
Grandma's flat.

ACCEPTANCE
Rooms of light.
